

## Seniority Vaccination: Our Top Priority and Obligation

The Covid19 vaccination process is well underway here in Southern Nevada, with clinics and vaccination sites totaling 304,109 doses administered to date. We are currently in our second phase of the vaccination process, prioritizing senior citizens (70+ year of age.). These elder citizens need our help, as they are considered 'high risk' and therefore receiving seniority within the vaccination effort.

However, the process of scheduling appointments online, checking email for reminders, and transportation to and from vaccination sites can be difficult for many due to their advanced age. So, while the rest of us are awaiting our turn to get the vaccine, we should lend a helping hand to our family members, friends and neighbors in need. Let's help each other through this difficult time and ensure all of our loved ones receive the vaccine in a safe, simple and orderly fashion. We are all in this together, and together we will thrive!
